

# 4-H Rocketry 2009-2010

*This fun and exciting project will not only allow you to build and launch the rockets into the air, but to also learn the aeronautics to make your rocket to go higher and straighter than anyone else's.*

*In this project you will launch both kit and "from-scratch" rockets. Though with each one you can make them as wild and sci-fi as you want.*

**(completely safe)**

# Solid Engine and Water Bottle Rockets

Lorraine Larsen-Hallock, Leader  
Andrew Martinez, Sr. Teen  
Leader  
Jacob Gray, Teen Leader  
Tyler Schmid, Teen Leader
